## Signature Confirmation Form

New England Assistive Technology (NEAT), an Oak Hill Center, uses Google Forms to make their intake and referral forms digitally available and accessible to a wide array of assistive technology (AT). However, Google Forms does not have an easy to use signature tool, so NEAT makes use of this form instead to allow people that we work with to provide their signature. Please read the contents of the form, fill it out completely, and provide your signature at the bottom.

Providing a signature on this form is the same providing a signature on whatever NEAT form you are currently working on. Fill out this form and then upload it to the Google Form you are working on to help complete that Google Form.

What NEAT Google Form are you working on? Type its title here:

Please sign here as you would sign any form and confirm that you filled it out accurately to the best of your ability:

Enter the date here:
